Recycling Plastic in Year 2

During their 'Protect our Planet' topic, the children in Year 2 felt that they wanted to do something to help make sure all our plastic milk bottles are recycled. Sometimes they are ending up in classroom bins rather than our recycling bin because it is in the hall and not convenient. We therefore ordered these plastic baskets for each class to put empty milk bottles in so they can be recycled.

Courageous Advocacy

In our topic lessons, we have been learning about plastic pollution and the impact on the environment

Autumn Term 2

We learned that a lot of plastic litter ends up in our oceans. We learned about Henderson Island, an small uninhabited island that is covered in plastic pollution. We wanted to do something about it.

Dear Miss Glassbrook,
We are sure that you will have heard about the problems with plastic pollution. Plastic ends up in the ocean and ruins places like Henderson Island. It happens because people leave plastic rubbish on the floor. We have seen this on our playground.

This was our response ...

Dear Dragonflies Class,
Thank you for writing to me. I am sad that you have seen rubbish on our lovely playground and I am so proud of you for wanting to help our school to recycle plastics and clear up the playground.
I have asked Miss Scott to order 4 baskets for the playground and will bring them to your classroom once they arrive.
Thank you so much for looking after our school. If you have any other ideas of how you can help our school, please let me know.
Kind regards,
Mrs Prosser
