Our English Curriculum

Reading is important, because if you can read, you can learn anything about everything and everything about anything. – Tomie DePaola

Intent

At St Andrew's our aim is to plan for an English curriculum that engages, excites and empowers our children whilst preparing them for today and tomorrow. We have designed an English curriculum that reflects the needs of our children and:

- Is progressive in skills and knowledge
- Builds on children's prior knowledge
- Provides relevant and stimulating learning experiences
- Promotes diversity and inclusion

- Has vocabulary at the heart of excellent daily practice
- Develops effective and successful communicators of the future
- Develops a love of reading and a passion for writing

Our English curriculum brings together the important skills of reading, writing, speaking and listening. We equip our children to be critical thinkers and effective communicators both in written and oral forms. Underpinning all other areas of the learning we believe that our English curriculum equips St Andrews's' children with essential skills to enable them to be life-long learners.

Implementation

We teach English using a reading in to writing approach which is interlinked with vocabulary development. This provides our children with exciting texts to read and something interesting to write about. The vocabulary and grammar we teach our children comes from the rich texts which they are exposed to and transfers into children's own writing. Vocabulary and grammar development is an integral aspect of English units of work.

Non-fiction, fiction and poetry units of work are planned around texts which where possible link to the half termly topic. We do this because it helps children form links across topics and learning is extended and embedded. Children

have opportunities to draft, write and edit their work based upon feedback and marking provided by the teacher. Children have opportunities to write in different genres for a variety of audiences and purposes. This brings their writing to life!

Our EYFS and KS1 children take part in daily phonics lessons. All children are taught to read using a variety of ways; these include 1:1 reading sessions, whole class and guided reading sessions. Children practice reading daily and adults reading to children is a fundamental part of our daily teaching.

We use Letters and Sounds phonics programme and a range of reading books from phonetically decodable texts to free choice reading books.

Spelling and handwriting is taught explicitly to children in a progressive way, intertwined with plenty of practise.

Language and communication skills are developed through all aspects of our whole school curriculum and children are given many opportunities to talk, listen, present and engage with other. These include activities such as taking part in assemblies, explaining how something works, reading aloud to the class. Local authors and reading events are incorporated into the English curriculum where possible.

Impact

Staff identify the impact of our curriculum through a variety of ways. These include:

- Observations
- Regular recall and retrieval activities
- Targeted questioning
- Marking and feedback
- Teacher assessment against key performance indicators and
- Formal testing at summative points.
- Pupil interviews
- Analysis of data

We use these strategies to review our curriculum offer, inform our strategic action planning and make adaptations where necessary.

We know our curriculum is effective when we see:
